

Pure A&S Case Innovation!

A&S's entire focus is on innovation, and meeting the changing needs of our customers. To this end, A&S has introduced a number of exclusively engineered products and materials over the last few years. These include:

The A&S airack®: The A&S airack® has the smallest carbon footprint of any rack case. A&S airack® utilizes 98% reusable & recyclable materials. We have completely replaced foam with A&S Shock Mounts™ in a revolutionary approach that utilizes rubber isolators that improve cooling, airflow and extends the life span of your electronic gear, eliminating decomposing foam around racked equipment.

A&S FlyWeight®: Cases made out of A&S FlyWeight® are up to 60% lighter than our traditional ATA cases, but even stronger, and within the first few trips they pay for themselves. FlyWeight® is a sandwich panel made of aluminum, Nomex® or Kevlar® honeycomb with protective layers of unidirectional fiberglass on both sides.

Kriz-Kraft™: The Kriz-Kraft™ design is, undoubtedly, the strongest rack case in the industry. This strength comes primarily from the contiguous box construction. The doors are precision-cut in the front and rear panels and fitted with a proprietary door jam and U-Channel to provide a meticulous fit. While stronger than traditional rack cases, Kriz-Kraft™ racks are more maneuverable, and quicker to set up and take down at a jobsite.

Since A&S clients are so satisfied with the strength of our Kriz-Kraft™ racks, we've incorporated the **Kriz-Kraft™** design into a new line of exciting products. A&S exclusively engineers the **A&S Kriz-Kraft™ AxeBox™**, the **A&S Kriz-Kraft™ DrumBox™** and the **A&S Kriz-Kraft™ WardroBox™**. This approach has also given A&S the Advantage of offering cases with smaller footprints answering the ever increasing demand for decreased weight and size.

The A&S Nest™ a Kriz-Kraft Plasma/LCD Lift Case: The A&S Nest™ protects the screen both in transit and during setup since the screen simply rises out of the case on a quiet electrical lift. The screen never leaves the protection of the case.

Put A&S innovations to work for you today.
